

Bakfiets.nl

has changed the look of cycling in the Netherlands, United Kingdom and many other countries. Their concept of carrying children in a cargo bike was innovative and is now accepted world-wide as an alternative and green form of transport. For many parents using a Bakfiets.nl Cargobike or Cargotrike is a liberating and life changing experience especially on the school run in busy towns and cities where the volume of traffic has become a big problem. Since the first model, there has been continuing development to enable you to carry babies, children, dogs, shopping and cargo with ease and in safety.

→ Electric Assist

Almost all CargoBikes and Trikes are available with an electric driven assist motor. This makes cycling more comfortable (lighter and faster). The motor can also be used to assist you while pushing the bike.

The battery can be placed in the rear rack or mounted on the box and is removable.

→ Shimano STEPS

All the Cargobikes and Trikes make use of the Shimano Steps (DU6100). This powerful motor is light and reliable, and is located at the bottom bracket. The motor has a good range and long battery life. The handlebar mounted display is simple to use and has a handlebar mounted toggle switch to change between the functions and power settings. There is even a walk function for pedestrianised areas when dismounted.

Available gear options

Steps is available in combination with different gear options: Sram Duomatic 2 speeds auto change hub with Shimano rollerbrakes, Shimano Nexus 7 speed with Rollerbrakes, Shimano Di2 8 speed hub with electronic gear changer and the Shimano rollerbrakes NuVinci continuously variable hub gear with rollerbrakes

Di2

The Di2 version is fully integrated with the motor and by means of electronic control the motor automatically reduces power slightly to enable smooth electronic gear shifting. The system automatically shifts down when coming to a halt therefore you are in the right gear to set off again. Or you can choose to manually select the gears with the toggle switch on the handlebar.

Automatic Shifting

The combination of our drive unit and the Di2 internal gear hub enables you to use the fully automatic shifting function. Torque, speed and cadence are monitored to automatically and smoothly shift to the right gear. You can switch back to manual shift whenever you want.

→ Operating Range

Pay attention: for a Cargobike its hard to specify the exact operation range. The operation range can vary between 25 km and 70 km (15 and 50 miles). This depends on the total weight (rider + load) of the Cargobike, the level of assistance chosen from the motor. The terrain to be covered—flat—hilly or mountainous. City or country environments will have a big influence, stopping and starting especially. Its possible to increase the operation range by driving away in a low gear and by making sure that the tires are inflated.

We deliver the bikes standard with a 418Wh battery, optionally there can be chosen for the upgraded 500Wh version, which has a 20% larger operating range.

Motor unit

Weighs 3.2 kilos and has intelligent assistance for a natural feel.

Accu

36 Volt weight: 2,55 kg.
Also sold independently:
418 Wh
500 Wh

Display

Standard bike functions, range, battery condition and for Di2 version gear indication.

Charger

Can fully charge the battery in only 4 hours.

Toolkit

Gives information about: speed, distance, estimated range, battery condition and support status.

Operating switch

→ CargoBike Classic Short Steps

The Cargobike classic short Steps is a traditional CargoBike with the Shimano Steps motor. The motor is mounted in the bottom bracket and the removable battery is integrated in the carrier. The motor detects rotation, cadance and torque to give you smooth power assistance.

Dimensions Cargobike short: length 228cm x width 63cm.

Colours: gloss black / petrol blue / matt granite

→ Shadow Steps

The Shadow is the top model from Bakfiets.nl. With its aluminum frame, Shimano Steps mid-engine, aluminum profile box with trampoline fabric. This model is the lightest and stiffest cargobike within our product range due to the aluminium double walled spiderweb tube in the frame. This makes cycling on this cargo bike a natural experience. The hydraulic brakes and strong rims make the Shadow a very stable and safe cargobike. The dimension of the box are equal to the CargoBike Long, so most accessories will fit.

Dimensions Shadow: length 253cm x width 63cm.

Colours: matt black / matt army green / matt granite

→ CargoTrike Classic Narrow Steps

The trike has more space than the Cargobike. There is standard room for four children. One of the benefits of the trike is the stability of the bike at lower speeds. **Take note that:** a lot of people still prefer the Cargobike due to the higher maneuverability of the bike.

Dimensions trike narrow: length 210cm x width 85 cm.
Dimensions bottom surface: length 86cm x width 54cm.

Colours: red / matt black / matt granite / petrol blue

→ CargoTrike Cruiser Narrow Steps

The Cargotrike narrow cruiser is a trike with a modern “vintage” appearance due to its creme fat tires, retro style 35 lux headlights, Brooks Aged leather saddle and handlebar grips. All Trikes are equipped with a steering stabilizer. This provides stable steering and prevents sudden change of direction when one wheel hits a small pit.

Dimensions trike narrow: length 210cm x width 85 cm.
Dimensions bottom surface: length 86cm x width 54cm.

Colours: red / matt black / matt granite / petrol blue

Bakfiets.nl

→ CargoBike XL

A CargoBike can be of great value for companies. Whether you work in parcel delivery, cleaning or maintenance, you'll always have your bike and tools close by as there's no hassle with parking. The CargoBike can be used as a marketing tool as well: it shows your company is green and flexible. On this page you'll find CargoBikes specially designed to carry whatever loads you need to transport.

The CargoBike XL is equipped with an extra long frame, so there is even more space for your goods. The XL can also be delivered with just a baseplate, so you can mount your own construction to fit your needs.

We also provide the XL with a simple rack or a complete flightcase, so you can start delivering your parcels right away.

Dimensions CargoBike XL: length 288cm x width 65cm.
 Dimensions base plate: length 102cm x width 42cm.
 Max load (driver included): 180kg

Colours: black

→ Riksja

Drivers and passengers can talk to each other comfortably and enjoy the surroundings in peace. The Riksja is a fantastic way to explore the city. This electric taxi is equipped with a Shimano Steps mid-engine. This makes it very durable and also much cheaper to use than a car (the battery is charged again for 10 cent!). The extendable footboard ensures that passengers can board safely. The Riksja is standard equipped with thick ventilating cushions. Optionally, the raincover and/or warm blanket can be ordered. The hood not only provides protection from the sun and rain, but also gives a cozy look.

Dimensions: Length 290cm x width 102cm

kleur: rood

Legenda: v = standard on bike, - = not possible option, amount = upprice for option in holland, *1 = only possible on bike with hub dynamo

→ Custom made

You can customise your CargoBike or CargoTrike with most of the upgrade options shown and see on this chart the compatibility with your model.

- **A Bakfiets.nl Cargobike is made in Hoogeveen (Netherlands)**
- **Is the safest way to transport your children with a bike according to ADAC • Easy to ride and manoeuvre**
- **Kids can climb safely in the box because of the solid 4 leg stand**
- **Bakfiets.nl uses FSC approved wood**
- **The box is made from waterproof Phenolic coated multiplex**
- **The powder coating is 3 layers both durable and impact resistant**
- **Stainless steel components are used where possible**
- **Top quality accessories with upgrade options**
- **High resale value due to superb build quality**
