

Bakfiets.nl

has changed the look of cycling in the Netherlands, United Kingdom and many other countries. Their concept of carrying children in a cargo bike was innovative and is now accepted world-wide as an alternative and green form of transport. For many parents using a Bakfiets.nl Cargobike or Cargotrike is a liberating and life changing experience especially on the school run in busy towns and cities where the volume of traffic has become a big problem. Since the first model, there has been continuing development to enable you to carry babies, children, dogs, shopping and cargo with ease and in safety.

→ Electric Assist

Almost all CargoBikes and Trikes are available with an electric driven assist motor. This makes cycling more comfortable (lighter and faster). The motor can also be used to assist you while pushing the bike.

The battery can be placed in the rear rack or mounted on the box and is removable.

→ Shimano STEPS

All the Cargobikes and Trikes make use of the Shimano Steps (DU6100). This powerful motor is light and reliable, and is located at the bottom bracket. The motor has a good range and long battery life. The handlebar mounted display is simple to use and has a handlebar mounted toggle switch to change between the functions and power settings. There is even a walk function for pedestrianised areas when dismounted.

Available gear options

Steps is available in combination with different gear options: Shimano Nexus 7 speed with Rollerbrakes, Shimano Di2 5 speed hub with electronic gear changer and the Shimano rollerbrakes Enviolo continuously variable hub gear with rollerbrakes

Nexus 5 speed hub

This hub is specially made for use in cargo bikes combined with a mid-engine. It has a sturdier build so it can withstand more force than a nexus 7 or 8 speed hub (see page 15 for more information).

Di2

The Di2 version is fully integrated with the motor and by means of electronic control the motor automatically reduces power slightly to enable smooth electronic gear shifting. The system automatically shifts down when coming to a halt therefore you are in the right gear to set off again. Or you can choose to manually select the gears with the toggle switch on the handlebar.

→ Operating Range

Pay attention: for a Cargobike its hard to specify the exact operation range. The operation range can vary between 25 km and 70 km (15 and 50 miles). This depends on the total weight (rider + load) of the Cargobike, the level of assistance chosen from the motor. The terrain to be covered—flat—hilly or mountainous. City or country environments will have a big influence, stopping and starting especially. Its possible to increase the operation range by driving away in a low gear and by making sure that the tires are inflated.

We deliver the bikes standard with a 418Wh battery, optionally there can be chosen for the upgraded 504Wh version, which has a 20% larger operating range.

CargoBike Classic Short Steps

The CargoBike classic short Steps is a traditional CargoBike with the Shimano Steps motor. The motor is mounted in the bottom bracket and the removable battery is integrated in the carrier. The motor detects rotation, cadance and torque to give you smooth power assistance.

Dimensions: CargoBike short: length 228cm x width 63cm.

→ Available gear options

Rollerbrakes:

Shimano 5v Di2: **NN5**
Shimano 7v: **NN7**

Disc brakes:

Shimano 5v Di2: **SS5**
Shimano 7v: **SS7**
Enviolo: **SSi**

Shimano 5v Di2: **MM5**
Shimano 7v: **MM7**
Enviolo: **MMi**

→ Accessories (See page. 26 to 31)

CargoBike Classic Long Steps

The CargoBike classic short Steps is a traditional CargoBike with the Shimano Steps motor. The motor is mounted in the bottom bracket and the removable battery is integrated in the back of carrier rack. The motor detects rotation, cadance and torque to give you smooth power assistance. Due to the longer box there is more space available for accessories such as the Maxi-Cosi or an extra bench.

Dimensions Cargobike long: length 253cm x width 63cm.

→ Available gear options

Rollerbrakes:

Shimano 5v Di2: **NN5**
Shimano 7v: **NN7**

Disc brakes:

Shimano 5v Di2: **SS5**
Shimano 7v: **SS7**

Shimano 7v: **MM7**
Enviolo: **MMi**

→ Accessories (See page. 26 to 31)

CargoBike Cruiser Long Steps

Similar to the CargoBike Classic Long Steps, but a vintage version with is broad mudguards in matching frame colour, Brooks Aged leather saddle and handlebar grips, a retro style 35 lux headlight and Plateo rear light. The battery is mounted on the back of the wooden box.

Dimensions Cargobike long: Length 253cm x width 63cm

Cargobike is shown with a black bok (extra charge).

→ Available gear options

Rollerbrakes:

Shimano 5v Di2: **NN5**
Shimano 7v: **NN7**

Disc brakes:

Shimano 5v Di2: **SS5**
Shimano 7v: **SS7**
Enviolo: **SSi**

Magura HS11 rim brakes:

Shimano 5v Di2: **MM5**
Shimano 7v: **MM7**
Enviolo: **MMi**

→ Accessories (See page. 26 to 31)

Shadow Steps

The Shadow is the top model from Bakfiets.nl. With its aluminum frame, Shimano Steps mid-engine, aluminum profile box with trampoline fabric. This model is the lightest and stiffest cargobike within our product range due to the aluminium double walled spiderweb tube in the frame. This makes cycling on this cargo bike a natural experience. The hydraulic brakes and strong rims make the Shadow a very stable and safe cargobike. The dimension of the box are equal to the CargoBike Long, so most accessories will fit.

Dimensions Shadow: length 253cm x width 63cm.

→ Available gear options

Disc brakes:

Shimano 5v Di2:	SS5
Shimano 7v:	SS7
Enviolo:	SSi

Magura HS33 rim brakes:

Shimano 5v Di2:	MM5
Shimano 7v:	MM7
Enviolo:	MMi

→ Accessories (See page. 26 to 31)

CargoTrike Classic Narrow Steps

The trike has more space than the Cargobike. There is standard room for four children. One of the benefits of the trike is the stability of the bike at lower speeds. **Take note that:** a lot of people still prefer the Cargobike due to the higher maneuverability of the bike.

Dimensions trike narrow: length 210cm x width 85 cm.
Dimensions bottom surface: length 86cm x width 54cm.

→ Available gear options

Rollerbrakes:

Shimano 5v Di2:
Shimano 7v:

NN5
NN7

→ Accessories
(See page. 26 to 31)

CargoTrike Cruiser Narrow Steps

The Cargotrike narrow cruiser is a trike with a modern "vintage" appearance due to its creme fat tires, retro style 35 lux headlights, Brooks Aged leather saddle and handlebar grips. All Trikes are equipped with a steering stabilizer. This provides stable steering and prevents sudden change of direction when one wheel hits a small pit.

Dimensions trike narrow: length 210cm x width 85 cm.
Dimensions bottom surface: length 86cm x width 54cm.

→ Available gear options

Rollerbrakes:

Shimano 5v Di2:
Shimano 7v:

Shimano 7v: **NN7**
- Disc brakes:**
Shimano 5v Di2: **SS5**
Shimano 7v: **SS7**
Enviolo: **SSi**

Option hint:
Order your Trike with an extremely good front disc brakes with parking brake.

→ Accessories (See page. 26 to 31)

CargoTrike Cruiser Wide Steps

The Cargotrike wide cruiser is a trike with a modern “vintage” appearance due to its creme fat tires, Brooks Aged leather saddle and handlebar grips and retro style 35 lux headlights. All Trikes are equipped with a steering stabilizer.

Take note off: In the cruiser trikes the battery is mounted in the carrier (this carrier is also compatible with a child seat).
Dimensions trike wide: length 210cm x width 95 cm.
Dimensions bottom surface: length 86 cm x width 65 cm.

Shimano Nexus 5 especially for E-bikes

Bakfiets.nl has chosen a number of models for the Nexus 5 hub. This hub has been specially developed for use in combination with a mid-engine. It is built more solidly than an 8-speed hub so that it can withstand more power. This hub is available with a DI2 unit (automatic shifting), and can often be combined with disc, magura and roller brake brakes

Benefits include:

Shifting lighter (especially when upshifting):

The Shimano STEPS system combined with this hub, gives a higher torque of 60Nm

Hubs for E-BIKES equipped with a mid-engine face higher forces compared to hubs for regular bicycles.

The new NEXUS INTER-5E hub can handle these forces, because it is stronger and more durable.

As can be seen on the right, the drive mechanism has a larger bearing loop rings and larger rolling bodies, as compared to the 8 speed hub. This to increase durability and strength.

The internal unit consists of 2 main parts and has 4 planet gears instead of 3, as with the other NEXUS hubs. This extra planet wheel provides more stability. This is better from a durability point of view, as the load is now distributed over 4 sprockets instead of 3. This means that each planet gear is less loaded.

CargoBike Classic Short

The CargoBike Classic Short is most similar to the original model, easy to steer, has a low centre of gravity and a wooden box where children can easily get in and out off. The unique four footed stand gives complete stability to the cargobike while loading and when parked. Also the magnetic safety belts are easy to use. Dimensions Cargobike short: length 228cm x width 63cm.

→ Available gear options

- Rollerbrakes:**
Shimano 7v: **NN7D**
Shimano 8v: **NN8D**
- Coaster brake with rollerbrake (front):**
Shimano 8v: **NR8D**
- Magura HS11 rim brakes:**
Shimano 7v: **MM7D**
Shimano 8v: **MM8D**
Enviolo: **MMiD**

→ For the version with electric assistance see page 4 to 5.

→ Accessories
(See page. 26 to 31)

CargoBike Cruiser Short

The CargoBike Cruiser Short is a vintage version of the Classic model with fat tyres for comfort, broad mudguards in matching frame colour, Brooks Aged leather saddle and handlebar grips and a retro style 35 lux headlight and Plateo rear light (both powered by the hub dynamo and with standlight function). There is no rear carrier rack fitted. Dimensions Cargobike short: Length 253cm x width 63cm

→ Available gear options

- Rollerbrakes:**
Shimano 7v: **NN7D**
Shimano 8v: **NN8D**
- Coaster brake with rollerbrake (front):**
Shimano 8v: **NR8D**
- Magura HS11 rim brakes:**
Shimano 7v: **MM7D**
Shimano 8v: **MM8D**
Enviolo: **MMiD**

→ For the version with electric assistance see page 4 to 5.

→ Accessories
(See page. 26 to 31)

CargoBike Classic Long

The CargoBike Classic Long is identical to the Short but with a stretched frame and box. It has the space to carry up to 3 children by adding an extra bench at the front, or 2 children on the rear bench and a baby in a Maxi Cosi or white a woolly baby/toddler seat in the front area. You can also carry a dog with a top cage or add a door in the side of the box for easy entrance. In short, there are a lot of options available.

Dimensions Cargobike long: length 253cm x width 63cm.

→ Available gear options

Rollerbrakes:

Shimano 7v:	NN7D
Shimano 8v:	NN8D

Coaster brake with rollerbrake (front):

→ Accessories
(See page. 26 to 31)

CargoTrike Classic Narrow

The trike has more space then the Cargobike, it also is more stable at lower speeds. There is standard room for four children due to the two included benches. There is also a handy step on top of the mudguards to help them get in and out of the box. As an accessory there is a user friendly tent and/ or pool cover available (in two colors).

Dimensions trike narrow: length 210cm x width 85cm.

Dimensions bottom surface: length 86cm x width 54.

→ Available gear options

Rollerbakes:

Shimano 7v: **NN7D**
Shimano 8v: **NN8D**

Coaster brake with rollerbrake (front):

Shimano 8v: **NR8D**

Riksja

Drivers and passengers can talk to each other comfortably and enjoy the surroundings in peace. The Riksja is a fantastic way to explore the city. This electric taxi is equipped with a Shimano Steps mid-engine. This makes it very durable and also much cheaper to use than a car (the battery is charged again for 10 cent!). The extendable footboard ensures that passengers can board safely. The Riksja is standard equipped with thick ventilating cushions. Optionally, the raincover and/or warm blanket can be ordered. The hood not only provides protection from the sun and rain, but also gives a cozy look.

Dimensions: Length 290cm x width 102cm

→ Options Riksja STEPS

Shimano 5 Di2 with disc brakes. **SS5**
 Shimano 8 rollerbrake rear. disc brake in front. **SN8**
 Enviolo with discbrakes **SSI**

Optional Raincover

Optional foot rug

Optional safety bracket

Daycare Trike

Deze Trike is geschikt gemaakt voor het veilig transporteren van maximaal 6 jonge kinderen in de bak (leeftijd +/- 2 tot 4 jaar). Eventueel past er nog een kinderstoeltje op de achterdrager waarmee er uiteindelijk 7 kinderen mee kunnen. Houd er rekening mee dat hoe ouder/groter de kinderen zijn, des te minder plek er over blijft.

Deze fiets is standaard uitgevoerd met sterke schijfremmen, rolbeugels, bankjes in de lengterichting en een handig instap-opening.
